The maximum recommended operating speed is 100 km/h, for which suitable tyres must be fitted. The maximum geared road speed of this vehicle at governed engine rpm is 123 km/h, with this vehicle Road Speed Limited to 100 km/h.

This vehicle was manufactured with an advanced braking/safety system, which included the functions of EBSS (ABS + Automatic Traction Control + Drag Torque Control).

This vehicle was manufactured with an ECER29 compliant cab structure and with a Front Underrun Protection System, in the style of a Temporary FUPS device.

This vehicle was fitted with an Identification Plate (formerly known as the Compliance Plate) in accordance with ADR61. Compliance of the identified Category NC vehicle is confirmed by the Identification Plate Approval Number stamped at the top of the plate.

Individual ADR numbers are not required when an Approval Number is provided, excepting ADR64 (Roadtrains and/or B-Doubles). This compliance, if applicable, is shown on the Vehicle Plate.

This vehicle is certified to ADR64 for Road Train and/or B-Double prime mover use (State permit requirements may be greater than ADR64 standards).

Please note that the above statements :

- do not affect the terms of any existing signed warranty agreement in respect of this Kenworth truck
- are not a separate warranty by Kenworth Trucks
- are not separate application approval for any specific use of this Kenworth truck.

No authorisation exists for other Engineering Signatories to rate or approve this original specification Kenworth truck above the ratings stated in this letter (Vehicle Standards Bulletin No.6, Section 5).

Any modification made after manufacture must be approved under the National Code of Practise for Heavy Vehicle Modifications and if the above ratings do vary, be approved and plated by an Authorised Engineering Examiner.

The National Code of Practise for Heavy Vehicle Modifications (Part A, Section A, 4.4) stipulates that "requirements of the ADR's and original manufacturer's modification guidelines shall take precedence". As Kenworth Trucks offers a wide range of alternative

manufacturer's original specifications, Kenworth Trucks can provide manufacturers ratings for most modifications (National Code of Practise for Heavy Vehicle Modifications, Section S1).

Yours faithfully,  
KENWORTH TRUCKS

#### CORRECTION:

Bring truck in to workshop and check over.  
Carry out troubleshooting for reported issues and found leaking intake valve.  
Removed cylinder head to inspect.  
Discuss engine repair with customer and opted to proceed with a cylinder head replacement.  
Fit customers supplied spare cylinder head to block and plumb up.  
Also replace the below parts during workscope:  
Thermostat - scored, may seize  
3x idler shafts - worn out of spec  
Turbo wastegate acutator - leaking  
Cylinder head bolts x11 - coroded/pitted  
Front cover plug - leaking oil  
Turbo intake clamp - thread stripping  
Radiator stay bushes - squashed, cracked  
Run up and check over.  
Wash down and road test.  
Check over and park for collection.

\*\* Customer to supply genuine Cummins cylinder head as requested. The supplied cylinder head is a second hand component.
